**TENSOR EXPANDS PRODUCTION CAPABILITIES
AT SIGNATURE GRAPHICS**

WOODRIDGE, IL (March 24, 2006) – Tensor Group, Inc., a premier U.S. manufacturer of web offset press equipment, has installed additional equipment at Signature Graphics in Portland, Oregon.

Signature Graphics boasts a significant Tensor press installation. The company recently added on to its existing Tensor pressline by purchasing two T-400BE 4-high towers and one H-50 heavy-duty jaw folder. Signature Graphics now operates over 40 Tensor press units and 6 folders, purchased since 1996. This installation marks the first T-400BE towers operating at this facility, and the increased speed rating and color capabilities were important factors in the purchasing decision.

The T-400BE towers are equipped with bearers, helical drive gears and an EPG remote inking system to further improve 4-color quality.

According to Brian Dutton from Signature Graphics, “Signature Graphics turns to Tensor Group for its printing needs because Tensor is one of the most innovative and responsive press manufacturers in the market today. The product is superior, and the customer service is equally efficient. Tensor’s staff is always there to aid the customer from installation of the press to start-up of the units, ensuring that the customer receives optimum performance of their Tensor equipment.”

Signature Graphics produces a wide variety of tabloid, weekly and monthly publications on its Tensor press.

Tensor Group, Inc. is a privately held manufacturer of single width web offset press equipment for commercial, insert and newspaper markets worldwide. Over 1600 units have been successfully installed in more than 23 countries since its inception in 1993. For additional information on Tensor equipment, visit the website at www.ustensor.com or call the corporate office at 630-739-9600.
